**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Beck et al.

The patent to Beck et al. shows a fuel injector comprising:

- a pressure intensifying chamber 150 communicating with a fuel supply passage 118 through a check valve 119 (Column 15, lines 35-40);
- a plunger 140 for pressure-intensifying fuel introduced into the pressure intensifying chamber;
- a needle valve 190 for injecting the fuel pressure intensified in the pressure intensifying chamber through an injection port;
- wherein there is provided in the fuel supply passage a throttle passage normally communicating with a fuel drain passage 120 (see Figure 5a), the throttle passage being a hole communicating with a first drain passage for the plunger as recited in claim 2;
- wherein the plunger is formed in a pressure intensifying cylinder using a fuel supplied and discharge by an electromagnetic valve 34a as an operating fluid and wherein the first drain passage communicates with a second drain

passage comprising passages 38 and 39 for the electromagnetic valve  
(Column 15 lines 3-11) as recited in claim 3.

***Allowable Subject Matter***

3. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Deckard, Tarr et al., Nakano, and Teerman et al. are pertinent to Applicant's invention in disclosing a fuel injector.
